

Shengbo Kang

Phone: (+39) 3242668785 (Mobile) | Email address: shengbokang.ai@gmail.com | Address: Bolzano/Bozen, Italy (other), Karlsruhe, Germany (other)

About myself

Seeking **HiWi / Master Thesis / Intern** (Erasmus+ funded) on Trustworthy AI and Multi-agent Safety. 5+ years of experience focused on CV, LLMs, Content Safety (NSFW), and Image Generation. **Availability:** From Nov 2026.

Education & Training

Erasmus+ Exchange | Karlsruhe Institute of Technology | 26/10/2026 - 30/09/2027 | Karlsruhe, Germany

Field(s) of study: Informatik

Master of Science | University of Bologna | 15/09/2025 - Current | Bologna, Italy

Field(s) of study: Artificial Intelligence | **Final grade:** Current: 30 and Honor (German equivalent: 1.0)

Master of Science | The Ohio State University | 22/08/2017 - 05/05/2019 | Columbus, United States

Field(s) of study: Electrical and Computer Engineering | **Final grade:** 3.625 (German equivalent 1.375)

Bachelor of Science | Shanghai Jiao Tong University | 01/09/2014 - 30/06/2018 | Shanghai, China

Field(s) of study: Information Engineering | **Final grade:** 3.283 (German equivalent: 1.92)

Work experience

Research Internship (Incoming) | Fraunhofer Italia-IEC | 01/05/2026 - 31/10/2026 | Bolzano/Bozen, Italy

Human-Centered Industry5.0: Develop multimodal(video, text and eye-tracking) models capable of real-time estimation of the level of assistance required by operators based on cognitive load/fatigue and their capabilities.

Senior AI Algorithm Engineer | Transsion | 13/03/2025 - 24/10/2025 | Shanghai, China

Image Generation with SDXL-Lightning

- Applied MiniCPM for image understanding and prompt generation.
- Leveraged Instant-ID to ensure id consistency.
- Utilized Depth, Canny and Tile ControlNet for image consistency.
- Implemented LoRA for style transfer.

Image Generation with Qwen-Image-Edit

- Applied int8w/o and nf4 quantization and 4-steps Lightning LoRA for model deployment.

Real-time Human Pose Estimation

- Iteratively optimized RTMPose based on the OpenMMLab framework to achieve robust human keypoint detection and skeleton extraction.

AI Algorithm Engineer | Kuaishou | 07/08/2023 - 10/04/2024 | Beijing, China

NSFW Video Understanding

- Leveraged Recognize Anything (RAM) for multi-label tagging of scenes, apparel, and sensitive body attributes.
- Utilized Swin-Transformer for image classification.
- Developed Multi-modal Factorized High-order pooling for multi-modal feature fusion and classification.
- Applied QwenVL, LLaVA, BLIP for data cleaning and labeling.
- Proposed a hierarchical knowledge base for RAG to adapt to changing rules.
- Achieved 95% precision while covering 50% of videos, supporting high-concurrency processing at 1000 QPS.

Engagement Bait Detection with Limited Data

- Constructed high-quality but limited Chain-of-Thought (CoT) text datasets.
- Utilized 72B LLM to generate synthetic reasoning data, implemented Knowledge Distillation and transferred its capabilities to 7B model.
- Applied LoRA to fine-tune the 7B student model on distilled CoT data.

AI Algorithm Engineer | ByteDance(TikTok) | 07/04/2021 - 19/06/2023 | Shanghai, China

Advertiser Moderation System

- Implemented Contrastive Learning for image representation.

- Utilized OCR, NER, SimHash and ANN for certification deduplication.
- Leveraged OCR and classification models (e.g., BERT, ResNet) for automated certification auditing and text classification.
- Achieved 95% precision while automating 60-80% moderation tasks across multiple business lines.

Global CRM Revenue Prediction

- Utilized Prophet and XGBoost for global sales departments and advertiser accounts revenue prediction.
- Applied lambda-Rank to improve advertiser ranking performance.

AI Algorithm Engineer | OPPO/OnePlus | 08/07/2019 - 02/04/2021 | Shenzhen, China

Scene Classification:Trained MobileNet-V3 for classification and applied Meta-recognition for post-processing.

Super Resolution and Deblur: Utilized ESRGAN for super resolution and Kernel-GAN for blur kernel generation to generate better synthetic training data.

HDR Deghost: Integrated optical flow, U-Net and denoising algorithm for HDR deghost.

Ultrasonic Proximity: Extracted the Doppler features from swept-frequency ultrasonic and the features of A-G sensors for DNN-based classification.

Wireless Design Intern | APPLE | 05/02/2018 - 07/06/2018 | Shanghai, China

Developed RF data testing and visualization tools for iPhone and iWatch.

Language Skills

Mother tongue(s): **Chinese**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C1	C1	C1	C1	C1

Skills

programming: Python, MATLAB and SQL | Deep Learning frameworks: PyTorch,Tensorflow,Keras| Caching Backend: Redis | Hadoop (HDFS, Hive, Sqoop, Pig) | Software Tools: GIT, Jira, Docker

Honours and Awards

Class C Scholarship of SJTU | Shanghai Jiao Tong University

Zhiyuan Engineering Honor Scholarship | Shanghai Jiao Tong University
