Shengbo Kang

Phone: (+39) 3242668785 (Mobile) | Email address: shengbokang.ai@gmail.com
| Address: Bologna, Italy (other), Karlsruhe, Germany (other)

About myself

Seeking **WiHi / HiWi / Master Thesis** (Erasmus+ funded, No visa sponsorship required, EU mobility). 5+ years of experience focused on Content Safety (NSFW), CV, LLMs, and Generative AI. **Availbility:** From Nov, 2026.

Education & Training

Erasmus+ Exchange | Karlsruhe Institute of Technology | 01/10/2026 - 30/09/2027 | Karlsruhe, Germany

Field(s) of study: Informatik

Master of Science | University of Bologna | 15/09/2025 - Current | Bologna, Italy

Field(s) of study: Artificial Intelligence | **Final grade:** Current: 30 and Honor (German equivalent: 1.0)

Master of Science | The Ohio State University | 22/08/2017 - 05/05/2019 | Columbus, United States

Field(s) of study: Electrical and Computer Engineering | **Final grade:** 3.625 (German equivalent 1.375)

Bachelor of Science | Shanghai Jiao Tong University | 01/09/2014 - 30/06/2018 | Shanghai, China

Field(s) of study: Information Engineering | **Final grade:** 3.283 (German equivalent: 1.92)

Work experience

Research Internship (Incoming) | Fraunhofer Italia-IEC | 01/05/2026 - 31/10/2026 | Bolzano/Bozen, Italy

Industry5.0: Develop multimodal(video, text and eye-tracking) models capable of real-time estimation of the level of assistance required by operators based on cognitive load/fatigue and their capabilities.

Senior AI Algorithm Engineer | Transsion | 13/03/2025 - 24/10/2025 | Shanghai, China

Image Generation with SDXL-Lightning

(1) Applied MiniCPM for image understanding and prompt generation.

(2) Leveraged Instant-ID to ensure id consistency.

(3) Utilized Depth, Canny and Tile ControlNet for image consistency.

(4) Implemented LoRA for style transfer.

Image Generation with Qwen-Image-Edit

(1) Applied int8w/o and nf4 quantization and 4-steps Lightning LoRA for model deployment.

Real-time Human Pose Estimation

(1) Iteratively optimized RTMPose based on the OpenMMLab framework to achieve robust human keypoint detection and skeleton extraction.

AI Algorithm Engineer | Kuaishou | 07/08/2023 - 10/04/2024 | Beijing, China

NSFW Video Understanding

(1) Leveraged Recognize Anything (RAM) for multi-label tagging of scenes, apparel, and sensitive body attributes.

(2) Utilized Swin-Transformer for image classification.

(3) Developed Multi-modal Factorized High-order pooling (MFH) for multi-modal feature fusion and video classification.

(4) Applied QwenVL, LLaVA, BLIP for data cleaning and labeling.

(5) Achieved 95% precision while covering 50% of videos, supporting high-concurrency processing at 1000 QPS.

Engagement Bait Detection with Limited Data

(1) Constructed high-quality but limited Chain-of-Thought (CoT) text datasets.

(2) Utilized 72B LLM to generate synthetic reasoning data, implemented Knowledge Distillation and tranferred its capabilities to 7B model.

(3) Applied LoRA to fine-tune the 7B student model on distilled CoT data.

AI Algorithm Engineer | ByteDance(TikTok) | 07/04/2021 - 19/06/2023 | Shanghai, China

Advertiser Moderation System

(1) Implemented Contrastive Learning for image representation.

(2) Utilized OCR, NER, SimHash and ANN for certification deduplication.

(3) Leveraged OCR and classification models (e.g., BERT, ResNet) for automated certification auditing and text classification.

(4) Achieved 95% precision while automating 60-80% moderation tasks across multiple business lines.

Global CRM Revenue Prediction

(1) Utilized Prophet and XGBoost for global sales departments and advertiser accounts revenue prediction.

(2) Appied lambda-Rank to improve advertiser ranking performance.

AI Algorithm Engineer | OPPO/OnePlus | 08/07/2019 - 02/04/2021 | Shenzhen, China

Scene Classification:Trained MobileNet-V3 for classification and applied Meta-recognition for post-processing.

Super Resolution and Deblur: Utilized ESRGAN for super resolution and Kernel-GAN for blur kernel generation to generate better synthetic training data.

HDR Deghost: Integrated optical flow, U-Net and denoising algorithm for HDR deghost.

Ultrasonic Proximity: Extracted the Doppler features from swept-frequency ultrasonic and the features of A-G sensors for DNN-based classification.

Wireless Design Intern | APPLE | 05/02/2018 - 07/06/2018 | Shanghai, China

Developed RF data testing and visualization tools for iPhone and iWatch.

Language Skills

Mother tongue(s): **Chinese**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C1	C1	C1	C1	C1

Skills

programming: Python, MATLAB and SQL | Deep Learning frameworks: PyTorch,Tensorflow,Keras| Caching Backend: Redis | Hadoop (HDFS, Hive, Sqoop, Pig) | Software Tools: GIT, Jira, Docker

Honours and Awards

Class C Scholarship of SJTU | Shanghai Jiao Tong University

Zhiyuan Engineering Honor Scholarship | Shanghai Jiao Tong University
