Address: Karlsruhe, Germany

About Myself

Seeking **HiWi / Master Thesis / Intern** (Erasmus+ funded) on Trustworthy AI, Multi-agent Safety and Test-Time Adaptation. 5+ years of experience focused on CV, LLMs, Content Safety (NSFW), and Image Generation. **Availability:** From Nov 2026.

Education

- **[Erasmus+] Karlsruhe Institute of Technology | Germany** 10/2026-09/2027
 - **Major:** Informatik
- **[M.Sc.] University of Bologna | Italy** 09/2025-Present
 - **Major:** Artificial Intelligence **GPA:** 30L (German Equivalent:1.0)
- **[M.Sc.] The Ohio State University | United States** 08/2017-05/2019
 - **Major:** Electrical and Computer Engineering **GPA:** 3.625 (German Equivalent:1.375)
- **[B.Sc.] Shanghai Jiao Tong University | China** 09/2014-06/2018
 - **Major:** Information Engineering **GPA:** 3.307 (German Equivalent: 1.9)
 - **Honors:** Class C Scholarship of SJTU, Zhiyuan Engineering Honor Scholarship.

Work Experience

- **Research Internship | Fraunhofer-Italia | Bolzano/Bozen, Italy** 05/2026-Present
 - **Human-Centered Industry5.0:** Develop multimodal (video, text and eye-tracking) models capable of real-time estimation of the level of assistance required by operators based on cognitive load/fatigue and their capabilities.
- **Senior AI Algorithm Engineer | Transsion | Shanghai, China** 03/2025-10/2025
 - **Image Generation with SDXL**
 - Applied MiniCPM for image understanding and prompt generation.
 - Leveraged Instant-ID for id consistency and ControlNetUnion for image consistency.
 - Trained LoRA for style transfer.
 - **Image Generation with Qwen-Image-Edit**
 - Applied int8w/o and nf4 quantization and 4-steps Lightning LoRA for model deployment.
 - **Real-time Human Pose Estimation**
 - Iteratively optimized RTMPose based on the OpenMMLab framework to achieve robust human keypoint detection and skeleton extraction.
- **AI Algorithm Engineer | Kuaishou | Beijing, China** 08/2023-04/2024
 - **NSFW Video Understanding**
 - Leveraged Recognize Anything (RAM) for multi-label tagging of objective attributes.

- Utilized Swin-Transformer for image classification.
 - Developed Multi-modal Factorized High-order Pooling for multi-modal fusion.
 - Applied QwenVL, LLaVA, BLIP for data cleaning and labeling.
 - Proposed a hierarchical knowledge base for RAG to adapt to changing rules.
 - Achieved 95% precision with 50% recall, supporting high-concurrency processing at 1000 QPS.
- **Engagement Bait Detection with Limited Data**
 - Constructed high-quality but limited Chain-of-Thought (CoT) text datasets.
 - Utilized 72B LLM to generate synthetic reasoning data, implemented Knowledge Distillation and transferred its capabilities to 7B model.
 - Applied LoRA to fine-tune the 7B student model on distilled CoT data.
- **AI Algorithm Engineer | ByteDance (TikTok) | Shanghai, China** 04/2021-06/2023
 - **Advertiser Moderation System**
 - Implemented Contrastive Learning for image representation.
 - Utilized OCR, NER, SimHash and ANN for certification deduplication.
 - Leveraged OCR and classification models (e.g., BERT, ResNet) for automated certification auditing and text classification.
 - Achieved 95% precision and covered 60-80% moderation tasks across multiple business lines.
 - **Global CRM Revenue Prediction**
 - Utilized Prophet and XGBoost for global sales departments and accounts revenue prediction.
 - Applied lambda-Rank to improve advertiser ranking performance.
- **Image Algorithm Engineer | OPPO | Shenzhen, China** 07/2019-04/2021
 - **Scene Classification:** Trained MobileNet-V3 and applied meta-recognition for post-processing.
 - **Super Resolution and Deblur:** Utilized ESRGAN for super resolution and Kernel-GAN for blur kernel generation to generate better synthetic training data.
 - **HDR Deghost:** Integrated optical flow, U-Net and denoising algorithm for HDR deghost.
 - **Ultrasonic Proximity:** Extracted the Doppler features from swept-frequency ultrasonic and the features of A-G sensors for DNN-based classification.
 - **Gesture Recognition with MMW Signal:** Calculated 2-D FFT for reflected signal. Utilized RDM as the features for DNN classification and extracted the angle information by phase offset.
- **Wireless Design Internship | APPLE | Shanghai, China** 02/2018-06/2018
 - Wrote wireless data testing and data visualization scripts for iPhone and iWatch.

Language Skills

- **English:** C1, Professional Working Proficiency **Chinese:** Mother tongue

Skills

- **Code:** Python, Matlab, PyTorch, TensorFlow, SQL
- **Others:** Redis, Hadoop, Git, Docker, Qualcomm SNPE NN deployment
